Rathbone Greenbank Global Sustainability Fund

Investment objective

We aim to deliver a greater total return than the FTSE World Index, after fees, over any seven-year period. There is no guarantee that this investment objective will be achieved over seven years, or any other time period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (dividend payments). We use the FTSE World Index as a target for our fund's return because we want to offer you higher returns than global stock markets.

We also compare our fund against the Investment Association (IA) Global sector to give you an indication of how we perform against other funds in our peer group. Like us, the funds in this sector invest globally, although most of them don't invest using a sustainability framework.

Investment strategy

Sustainable investing means different things to different people. For us, sustainable investing is about long-term value creation for investors, society and the environment.

We invest in companies that operate sustainably and are committed to helping achieve the United Nations Sustainable Development Goals. We avoid companies that fail our rigorous sustainability criteria. We believe that companies displaying strong environmental, social and governance policies and practices are likely to be well positioned to deliver long-term value for investors. For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights. As shareholders we work with companies to encourage best practice and highlight any concerns we have.

When choosing investments we use our own trinity of risk framework: price, business and financial. We look for businesses that offer good value and make strong and consistent profits with high quality earnings - those that are backed by real cash rather than accounting contrivance. Companies shouldn't have more debt than they can handle.
