Rathbone Greenbank Global Sustainable Bond Fund

Investment objective

We aim to deliver a greater total return (income and capital growth) than a composite benchmark, after fees, over any rolling five-year period. There is no guarantee that this investment objective will be achieved over five years, or any other time period. Composite benchmark: 70% ICE BofA Global Corporate Index (Hedged to GBP), 15% ICE BofA Global Government Excluding Japan Index (Hedged to GBP), 15% ICE BofA All Maturity Global High Yield Index (Hedged to GBP).

Investment strategy

To meet the objective, the fund manager will invest globally with at least 60% in investment grade credit (with a credit rating of AAA to BBB-). The remaining 40% of the fund may be invested in government bonds, investment grade corporate bonds or high yield corporate bonds (with a credit rating below BBB- or with no rating at all). Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund

Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbones Asset Management Limited.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice. Interest rate fluctuations are likely to affect the capital value of investments within bond funds. When long term interest rates rise the capital value of units is likely to fall and vice versa. The effect will be more apparent on funds that invest significantly in long-dated securities. The value of capital and income will fluctuate as interest rates and credit ratings of the issuing companies change.

The annual management charge and other income expenses are paid out of the fund's capital.

Information notes

If you require clarity on any of the terms used in this factsheet then please refer to our Supplementary Information Document for further explanation.

^The ongoing charges figure (OCF) includes the Annual Management Charge and all appropriate costs that may be deducted from the fund's assets, in line with current regulatory and industry guidance. Where appropriate, the OCF may include a synthetic element relating to the costs incurred in underlying collective investment undertakings, where permitted by the Prospectus. The OCF is included in the Annual or Interim report and are calculated biannually.
