INVESTMENT OBJECTIVE

The objective of the fund is to deliver a greater total return than the Bank of England's Base Rate + 2%, after fees, over any three-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. The fund aims to deliver this return with no more than one-third of the volatility of the FTSE Developed stock market Index.

There is no guarantee that this investment objective will be achieved over three years, or any other time period.

We aim to deliver this return with no more than one-third of the volatility of the FTSE Developed stock market Index. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

INVESTMENT POLICY

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for investment purposes, efficient portfolio management and hedging. The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and units in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

FUND BENCHMARK

The benchmark used for the Rathbone Total Return Portfolio is: Bank of England Base Rate + 2%.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023

PERFORMANCE

In the six months ended 31 December 2023, the Rathbone Greenbank Total Return Portfolio S-class gained 4.3%. For the same period the fund's objective, the Bank of England Base Rate + 2%, returned 3.6%.

MARKET OVERVIEW

The second half of 2023 got better the more it progressed. Most major stock and bond markets posted decent gains, while corporate bond prices rose rapidly as well. Even government bonds made positive returns in a year of central bank tightening. The driver of these unexpected gains was a large fall in prevailing bond yields towards the end of the year as investors first hoped for and then pre-emptively celebrated a 2024 of falling central bank interest rates, muted inflation and absent recession. It was an old-fashioned Santa rally: the returns came before the presents were handed out.

As far back as August we thought that global interest rates – as set by the world's most important central bank, the US Federal Reserve (Fed) – had peaked. Inflation, while bumpy, was clearly falling, even as global economic growth was holding up better than expected. The US economy was practically flying, though, and we felt that the Fed was unlikely to start cutting interest rates in 2023 or the first half of 2024 because it would risk putting the bellows to inflation. In December, Fed Chair Jay Powell seemed more disposed to cuts in the first half of 2024, as long as inflation fell back to the 2% target (it was 3.1% in November). While rate cuts are no doubt on the horizon, we still think investors may be getting overexcited about how quickly they will arrive. Perhaps the big variable now, rather than inflation, is US economic growth. If it continues to power ahead, the Fed will find it difficult to justify reducing borrowing costs. If it begins to falter, then the door to lower rates opens. Unfortunately, GDP growth is an extremely lagging number – you won't know it's slowing till months after it's started!

In the face of this watershed, we're trying to keep our portfolio balanced. We take profits from stocks and bond that have had particularly strong runs and recycle that money into holdings that have dipped yet still have exciting prospects over the next five years or more.

GLOBAL CROSSROADS

The world is no longer as homogenous as it once was. While the US economy has boomed, the UK, Europe and Asia have faded. And while the economic fade hasn't been as bad as many expected, it's stark when compared with the US. These divergent paths – and the divergent central bank policies that are being applied – are causing some large swings in both stock and bond prices as investors weigh up the relative rates of return on offer in different regions.

Here in the UK, with inflation at 3.9%, the Bank of England (BoE) is adamant that it won't be cutting interest rates anytime soon. That's despite the economy slipping into recession territory and many households struggling as they refinance mortgages at treble the monthly payments and rents going stratospheric. Bond investors aren't buying it: UK government bond prices now imply a 25-basis-point cut to 5.0% by May and a roughly 1.4% drop in the BoE's bank rate over the whole of 2024. We are also sceptical, and think that the BoE will have to ease pressure on households and businesses if recession sets in during the first quarter and unemployment starts to rise.

Europe is in a similar position following the Fed's 'pivot' to more accommodative policy. Like the UK, its central bank is on a 'higher for longer' footing even as its economy struggles. And also like in the UK, investors are expecting the European Central Bank to fold and begin cutting rates in early 2024. China fell into deflation in the summer, i.e. general prices for goods and services are falling, rather than rising. China is struggling with a massive property bubble where developers, local governments and households have borrowed huge amounts to build and buy millions of speculative properties that no one needs. Some aren't even finished. Deflation makes those debts grow in real (inflation-adjusted) terms. The deflation is partly caused by the heavy overhang of debt, but it also makes the burden of those debts worse. In short, it starts a toxic feedback loop which hamstring economic growth.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

China is still growing at an estimated 5%, however, and is actually convincingly overshooting what the IMF's World Economic Outlook had expected a year ago. No doubt aided by cheaper energy from, and increased commerce with, Russia in the aftermath of its invasion of Ukraine and subsequent sanctions by the West. However, many companies we see suggest the picture on the ground is far from as rosy as the headline numbers suggest. A heavily debt-laden Chinese trade partner is Japan. Its economic growth slumped unexpectedly in the third quarter as households and businesses abruptly stopped spending in the third quarter.

More than ever, the US seems to be the sole engine of economic growth. This may well encourage investors to put yet more money into the sunny uplands over the Atlantic and shun the problematic, yet often heavily discounted, markets elsewhere.

PORTFOLIO ACTIVITY

Because we think rates have peaked, both here and in the US, we've been in the habit of buying government and quasi-government bonds when yields pop higher (although, we don't buy US government bonds because they don't meet our sustainability criteria). These included the dollar-denominated International Bank for Reconstruction and Development 0.875% 2030 and European Investment Bank 3.75% 2033, and the UK Treasury 0.875% 2033 and 1.125% 2039.

Early in the period, when yields were rising, we swapped our relatively shorter-dated UK Treasury 4.25% 2032 bonds for those that mature much further in the future. The further into the future a bond matures and repays its capital, the more sensitive its price will be to changes in prevailing interest rates. That's because if market rates fall the value of earning more interest than anyone else can get today is factored into the price of the bond – and if you have that rate locked in for many years to come that's more valuable than if it's only for a few years. Similarly, if rates in the market rise your bond is earning less interest than you can get if you invested today, so the value of your bond will fall – and it will fall much more if you're locked into that poor rate for many years. With yields at multi-decade highs, we felt it made sense to increase our interest rate sensitivity (or 'duration' in the lexicon).

We expect the jerky sort of volatility – both up and down – that encapsulated 2023 to continue for the foreseeable future, which is why we bought the JPMorgan 4.5% Dispersion Note 2026 structured product in the period. Structured products are contracts with investment banks that pay specific returns when triggered by certain scenarios. This one pays us a quarterly coupon amounting to 4.5% each year, as well as a return based on the 'dispersion', or volatility of a basket of stocks relative to the volatility of the S&P 500 stock market index. By volatility, we mean that the prices of underlying stocks within the index move up and down more than the price of the index itself. This structured product will repay our capital and then some if the difference in volatility between the basket and the index widens between when we bought it and the January 2026 maturity. If the volatility difference decreases over the period, we will lose money.

We sold US logistics and warehouse supplier Zebra Technologies because we wanted to reduce our investments in industrial areas of the economy. We think that a mild recession is very possible in the coming year or so and Zebra, which supplies RFID gadgets and inventory management software to consumer-facing businesses, could be vulnerable.

Another complete sale was American stock Trex, which makes decking from recycled plastics, as its valuation seemed stretched after a strong rally this year.

In the third quarter we sold our telco Orange 9% 2031 bonds because the credit spread (the extra return offered above treasuries to compensate for the risk of default) had tightened considerably, so we felt it was prudent to look elsewhere. Another bond we sold was housing association A2D Funding II 4.5% 2026 over concerns it could see a regulatory downgrade led to pressure on the bond price.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

INVESTMENT OUTLOOK

The markets for bonds and locking in future interest rates imply that it's probable that the Fed will cut interest rates as soon as the first quarter. While anything is possible, we think it would require serious economic disintegration for the Fed to cut rates within the next four months or so. With current growth so high, that would be a breath-taking slump in economic activity. Instead, it seems more likely that the Fed will hold fast for a while yet. On a human level, we think central bankers' professional reputations and legacies are more at risk if they cut rates too early and let inflation flare up again. If they keep rates high and cause a minor recession, well, that's just the cost of prudent leadership...

Of course, that's not what the rest of the market hears when Fed voting members get to talking. We will have to wait and see. One of the main disconnects we see as 2024 kicks off is that many investors expect rates to follow a downward path that implies sharp economic deceleration, while simultaneously expecting chunky double-digit profit growth for companies that's rare in times of slowing (or falling) GDP.

To avoid being too badly burned by any disappointments, we've been trimming stocks whose valuations appear to have got a bit topmy and using that cash to add to stocks and other assets that have fallen from favour. We don't want to sell these businesses completely – lots of people want to buy them for a reason! – because over five years or more, we think they have the opportunity to grow well and become more valuable. Yet we try to minimise the short-term draughts that happen.

NOTES TO THE INTERIM FINANCIAL STATEMENTS**ACCOUNTING POLICIES**

The interim financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014 (and amended in June 2017).

All accounting policies applied are consistent with those of the annual report for the year ended 30 June 2023 and are detailed in full in those financial statements.

PORTFOLIO TRANSACTIONS

Total purchases and sales transactions for the half year ended 31 December 2023 were £11,342,948 (31 December 2022: £4,196,215) and £2,976,786 (31 December 2022: £4,086,949) respectively.

CROSS HOLDINGS

The Fund did not hold shares in any of the other Sub-Funds of Rathbone Greenbank Multi-Asset Portfolio at the period end.

DISTRIBUTION TABLES FOR THE HALF YEAR ENDED 31 DECEMBER 2023

DISTRIBUTION TABLES (PENCE PER SHARE)

First Interim

Group 1 – Shares purchased prior to 1 July 2023

Group 2 – Shares purchased on or after 1 July 2023 and on or before 30 September 2023

S-class income shares	Income	Equalisation	Paid 30.11.23	Paid 30.11.22
Group 1	0.50	—	0.50	0.32
Group 2	0.02	0.48	0.50	0.32

S-class accumulation shares	Income	Equalisation	Accumulated 30.11.23	Accumulated 30.11.22
Group 1	0.52	—	0.52	0.33
Group 2	0.18	0.34	0.52	0.33

Second Interim

Group 1 – Shares purchased prior to 1 October 2023

Group 2 – Shares purchased on or after 1 October 2023 and on or before 31 December 2023

S-class income shares	Income	Equalisation	Payable 29.02.24	Paid 28.02.23
Group 1	0.56	—	0.56	0.42
Group 2	0.25	0.31	0.56	0.42

S-class accumulation shares	Income	Equalisation	Allocated 29.02.24	Accumulated 28.02.23
Group 1	0.58	—	0.58	0.42
Group 2	0.46	0.12	0.58	0.42

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

INVESTMENT OBJECTIVE

The objective of the fund is to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation + 2%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. The fund aims to deliver this return with no more than half of the volatility of the FTSE Developed stock market Index.

There is no guarantee that this investment objective will be achieved over five years, or any other time period.

We use the CPI + 2% as a target for our fund's return because we aim to grow your investment above inflation. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

INVESTMENT STRATEGY

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for the purpose of efficient portfolio management and hedging. The fund does not use derivatives for investment purposes. In the event the fund intends to use derivatives for investment purposes shareholders will be given 60 days notice.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and units in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

FUND BENCHMARK

The benchmark used for the Rathbone Defensive Growth Portfolio is: UK Consumer Price Index + 2%.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023

PERFORMANCE

In the six months ended 31 December 2023, the Rathbone Greenbank Defensive Growth Portfolio S-class gained 4.3%. For the same period the fund's objective, the UK Consumer Price Index +2%, returned 1.3%.

MARKET OVERVIEW

The second half of 2023 got better the more it progressed. Most major stock and bond markets posted decent gains, while corporate bond prices rose rapidly as well. Even government bonds made positive returns in a year of central bank tightening. The driver of these unexpected gains was a large fall in prevailing bond yields towards the end of the year as investors first hoped for and then pre-emptively celebrated a 2024 of falling central bank interest rates, muted inflation and absent recession. It was an old-fashioned Santa rally: the returns came before the presents were handed out.

As far back as August we thought that global interest rates – as set by the world's most important central bank, the US Federal Reserve (Fed) – had peaked. Inflation, while bumpy, was clearly falling, even as global economic growth was holding up better than expected. The US economy was practically flying, though, and we felt that the Fed was unlikely to start cutting interest rates in 2023 or the first half of 2024 because it would risk putting the bellows to inflation. In December, Fed Chair Jay Powell seemed more disposed to cuts in the first half of 2024, as long as inflation fell back to the 2% target (it was 3.1% in November). While rate cuts are no doubt on the horizon, we still think investors may be getting overexcited about how quickly they will arrive. Perhaps the big variable now, rather than inflation, is US economic growth. If it continues to power ahead, the Fed will find it difficult to justify reducing borrowing costs. If it begins to falter, then the door to lower rates opens. Unfortunately, GDP growth is an extremely lagging number – you won't know it's slowing till months after it's started!

In the face of this watershed, we're trying to keep our portfolio balanced. We take profits from stocks and bond that have had particularly strong runs and recycle that money into holdings that have dipped yet still have exciting prospects over the next five years or more.

GLOBAL CROSSROADS

The world is no longer as homogenous as it once was. While the US economy has boomed, the UK, Europe and Asia have faded. And while the economic fade hasn't been as bad as many expected, it's stark when compared with the US. These divergent paths – and the divergent central bank policies that are being applied – are causing some large swings in both stock and bond prices as investors weigh up the relative rates of return on offer in different regions.

Here in the UK, with inflation at 3.9%, the Bank of England (BoE) is adamant that it won't be cutting interest rates anytime soon. That's despite the economy slipping into recession territory and many households struggling as they refinance mortgages at treble the monthly payments and rents going stratospheric. Bond investors aren't buying it: UK government bond prices now imply a 25-basis-point cut to 5.0% by May and a roughly 1.4% drop in the BoE's bank rate over the whole of 2024. We are also sceptical, and think that the BoE will have to ease pressure on households and businesses if recession sets in during the first quarter and unemployment starts to rise.

Europe is in a similar position following the Fed's 'pivot' to more accommodative policy. Like the UK, its central bank is on a 'higher for longer' footing even as its economy struggles. And also like in the UK, investors are expecting the European Central Bank to fold and begin cutting rates in early 2024. China fell into deflation in the summer, i.e. general prices for goods and services are falling, rather than rising. China is struggling with a massive property bubble where developers, local governments and households have borrowed huge amounts to build and buy millions of speculative properties that no one needs. Some aren't even finished. Deflation makes those debts grow in real (inflation-adjusted) terms. The deflation is partly caused by the heavy overhang of debt, but it also makes the burden of those debts worse. In short, it starts a toxic feedback loop which hamstring economic growth.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

China is still growing at an estimated 5%, however, and is actually convincingly overshooting what the IMF's World Economic Outlook had expected a year ago. No doubt aided by cheaper energy from, and increased commerce with, Russia in the aftermath of its invasion of Ukraine and subsequent sanctions by the West. However, many companies we see suggest the picture on the ground is far from as rosy as the headline numbers suggest. A heavily debt-laden Chinese trade partner is Japan. Its economic growth slumped unexpectedly in the third quarter as households and businesses abruptly stopped spending in the third quarter.

More than ever, the US seems to be the sole engine of economic growth. This may well encourage investors to put yet more money into the sunny uplands over the Atlantic and shun the problematic, yet often heavily discounted, markets elsewhere.

PORTFOLIO ACTIVITY

Because we think rates have peaked, both here and in the US, we've been in the habit of buying government and quasi-government bonds when yields pop higher (although, we don't buy US government bonds because they don't meet our sustainability criteria). These included the dollar-denominated International Bank for Reconstruction and Development 0.875% 2030 and European Investment Bank 3.75% 2033, and the UK Treasury 0.875% 2033 and 1.125% 2039.

Early in the period, when yields were rising, we swapped our relatively shorter-dated UK Treasury 4.25% 2032 bonds for those that mature much further in the future. The further into the future a bond matures and repays its capital, the more sensitive its price will be to changes in prevailing interest rates. That's because if market rates fall the value of earning more interest than anyone else can get today is factored into the price of the bond – and if you have that rate locked in for many years to come that's more valuable than if it's only for a few years. Similarly, if rates in the market rise your bond is earning less interest than you can get if you invested today, so the value of your bond will fall – and it will fall much more if you're locked into that poor rate for many years. With yields at multi-decade highs, we felt it made sense to increase our interest rate sensitivity (or 'duration' in the lexicon).

In December, after a substantial fall in government bond yields, we took profits by selling some of our UK Treasury 0.875% 2033.

We expect the jerky sort of volatility – both up and down – that encapsulated 2023 to continue for the foreseeable future, which is why we bought the JPMorgan 4.5% Dispersion Note 2026 structured product in the period. Structured products are contracts with investment banks that pay specific returns when triggered by certain scenarios. This one pays us a quarterly coupon amounting to 4.5% each year, as well as a return based on the 'dispersion', or volatility of a basket of stocks relative to the volatility of the S&P 500 stock market index. By volatility, we mean that the prices of underlying stocks within the index move up and down more than the price of the index itself. This structured product will repay our capital and then some if the difference in volatility between the basket and the index widens between when we bought it and the January 2026 maturity. If the volatility difference decreases over the period, we will lose money.

We sold US logistics and warehouse supplier Zebra Technologies because we wanted to reduce our investments in industrial areas of the economy. We think that a mild recession is very possible in the coming year or so and Zebra, which supplies RFID gadgets and inventory management software to consumer-facing businesses, could be vulnerable.

Another complete sale was American stock Trex, which makes decking from recycled plastics, as its valuation seemed stretched after a strong rally this year.

In the third quarter we sold our telco Orange 9% 2031 bonds because the credit spread (the extra return offered above treasuries to compensate for the risk of default) had tightened considerably, so we felt it was prudent to look elsewhere.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

INVESTMENT OUTLOOK

The markets for bonds and locking in future interest rates imply that it's probable that the Fed will cut interest rates as soon as the first quarter. While anything is possible, we think it would require serious economic disintegration for the Fed to cut rates within the next four months or so. With current growth so high, that would be a breath-taking slump in economic activity. Instead, it seems more likely that the Fed will hold fast for a while yet. On a human level, we think central bankers' professional reputations and legacies are more at risk if they cut rates too early and let inflation flare up again. If they keep rates high and cause a minor recession, well, that's just the cost of prudent leadership...

Of course, that's not what the rest of the market hears when Fed voting members get to talking. We will have to wait and see. One of the main disconnects we see as 2024 kicks off is that many investors expect rates to follow a downward path that implies sharp economic deceleration, while simultaneously expecting chunky double-digit profit growth for companies that's rare in times of slowing (or falling) GDP.

To avoid being too badly burned by any disappointments, we've been trimming stocks whose valuations appear to have got a bit topmy and using that cash to add to stocks and other assets that have fallen from favour. We don't want to sell these businesses completely – lots of people want to buy them for a reason! – because over five years or more, we think they have the opportunity to grow well and become more valuable. Yet we try to minimise the short-term draughts that happen.

RATHBONE GREENBANK DEFENSIVE GROWTH PORTFOLIO
NOTES TO THE INTERIM FINANCIAL STATEMENTS

ACCOUNTING POLICIES

The interim financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014 (and amended in June 2017).

All accounting policies applied are consistent with those of the annual report for the year ended 30 June 2023 and are detailed in full in those financial statements.

PORTFOLIO TRANSACTIONS

Total purchases and sales transactions for the half year ended 31 December 2023 were £52,450,803 (31 December 2022: £18,024,340) and £11,009,619 (31 December 2022: £7,609,765) respectively.

CROSS HOLDINGS

The Fund did not hold shares in any of the other Sub-Funds of Rathbone Greenbank Multi-Asset Portfolio at the period end.

DISTRIBUTION TABLES FOR THE HALF YEAR ENDED 31 DECEMBER 2023

DISTRIBUTION TABLES (PENCE PER SHARE)

First Interim

Group 1 – Shares purchased prior to 1 July 2023

Group 2 – Shares purchased on or after 1 July 2023 and on or before 30 September 2023

S-class income shares	Income	Equalisation	Paid 30.11.23	Paid 30.11.22
Group 1	0.52	—	0.52	0.34
Group 2	0.16	0.36	0.52	0.34

S-class accumulation shares	Income	Equalisation	Accumulated 30.11.23	Accumulated 30.11.22
Group 1	0.54	—	0.54	0.34
Group 2	0.25	0.29	0.54	0.34

Second Interim

Group 1 – Shares purchased prior to 1 October 2023

Group 2 – Shares purchased on or after 1 October 2023 and on or before 31 December 2023

S-class income shares	Income	Equalisation	Payable 29.02.24	Paid 28.02.23
Group 1	0.53	—	0.53	0.42
Group 2	0.13	0.40	0.53	0.42

S-class accumulation shares	Income	Equalisation	Allocated 29.02.24	Accumulated 28.02.23
Group 1	0.55	—	0.55	0.44
Group 2	0.34	0.21	0.55	0.44

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

INVESTMENT OBJECTIVE

We aim to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation +3%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use the CPI +3% as a target for our fund's return because we aim to grow your investment above inflation.

We aim to deliver this return with no more than two-thirds of the volatility of the FTSE Developed stock market Index. As an indication, if global stock markets fall our fund value should be expected to fall by around two-thirds of that amount. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

INVESTMENT POLICY

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for investment purposes, efficient portfolio management and hedging. The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and units in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

FUND BENCHMARK

The benchmark used for the Rathbone Strategic Income Portfolio is: UK Consumer Price Index +3%.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023

PERFORMANCE

In the six months ended 31 December 2023, the Rathbone Greenbank Strategic Growth Portfolio S-class gained 4.0%. For the same period the fund's objective, the UK Consumer Price Index +3%, returned 1.8%.

MARKET OVERVIEW

The second half of 2023 got better the more it progressed. Most major stock and bond markets posted decent gains, while corporate bond prices rose rapidly as well. Even government bonds made positive returns in a year of central bank tightening. The driver of these unexpected gains was a large fall in prevailing bond yields towards the end of the year as investors first hoped for and then pre-emptively celebrated a 2024 of falling central bank interest rates, muted inflation and absent recession. It was an old-fashioned Santa rally: the returns came before the presents were handed out.

As far back as August we thought that global interest rates – as set by the world's most important central bank, the US Federal Reserve (Fed) – had peaked. Inflation, while bumpy, was clearly falling, even as global economic growth was holding up better than expected. The US economy was practically flying, though, and we felt that the Fed was unlikely to start cutting interest rates in 2023 or the first half of 2024 because it would risk putting the bellows to inflation. In December, Fed Chair Jay Powell seemed more disposed to cuts in the first half of 2024, as long as inflation fell back to the 2% target (it was 3.1% in November). While rate cuts are no doubt on the horizon, we still think investors may be getting overexcited about how quickly they will arrive. Perhaps the big variable now, rather than inflation, is US economic growth. If it continues to power ahead, the Fed will find it difficult to justify reducing borrowing costs. If it begins to falter, then the door to lower rates opens. Unfortunately, GDP growth is an extremely lagging number – you won't know it's slowing till months after it's started!

In the face of this watershed, we're trying to keep our portfolio balanced. We take profits from stocks and bond that have had particularly strong runs and recycle that money into holdings that have dipped yet still have exciting prospects over the next five years or more.

GLOBAL CROSSROADS

The world is no longer as homogenous as it once was. While the US economy has boomed, the UK, Europe and Asia have faded. And while the economic fade hasn't been as bad as many expected, it's stark when compared with the US. These divergent paths – and the divergent central bank policies that are being applied – are causing some large swings in both stock and bond prices as investors weigh up the relative rates of return on offer in different regions.

Here in the UK, with inflation at 3.9%, the Bank of England (BoE) is adamant that it won't be cutting interest rates anytime soon. That's despite the economy slipping into recession territory and many households struggling as they refinance mortgages at treble the monthly payments and rents going stratospheric. Bond investors aren't buying it: UK government bond prices now imply a 25-basis-point cut to 5.0% by May and a roughly 1.4% drop in the BoE's bank rate over the whole of 2024. We are also sceptical, and think that the BoE will have to ease pressure on households and businesses if recession sets in during the first quarter and unemployment starts to rise.

Europe is in a similar position following the Fed's 'pivot' to more accommodative policy. Like the UK, its central bank is on a 'higher for longer' footing even as its economy struggles. And also like in the UK, investors are expecting the European Central Bank to fold and begin cutting rates in early 2024. China fell into deflation in the summer, i.e. general prices for goods and services are falling, rather than rising. China is struggling with a massive property bubble where developers, local governments and households have borrowed huge amounts to build and buy millions of speculative properties that no one needs. Some aren't even finished. Deflation makes those debts grow in real (inflation-adjusted) terms. The deflation is partly caused by the heavy overhang of debt, but it also makes the burden of those debts worse. In short, it starts a toxic feedback loop which hamstring economic growth.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

China is still growing at an estimated 5%, however, and is actually convincingly overshooting what the IMF's World Economic Outlook had expected a year ago. No doubt aided by cheaper energy from, and increased commerce with, Russia in the aftermath of its invasion of Ukraine and subsequent sanctions by the West. However, many companies we see suggest the picture on the ground is far from as rosy as the headline numbers suggest. A heavily debt-laden Chinese trade partner is Japan. Its economic growth slumped unexpectedly in the third quarter as households and businesses abruptly stopped spending in the third quarter.

More than ever, the US seems to be the sole engine of economic growth. This may well encourage investors to put yet more money into the sunny uplands over the Atlantic and shun the problematic, yet often heavily discounted, markets elsewhere.

PORTFOLIO ACTIVITY

Because we think rates have peaked, both here and in the US, we've been in the habit of buying government and quasi-government bonds when yields pop higher (although, we don't buy US government bonds because they don't meet our sustainability criteria). These included the dollar-denominated European Investment Bank 3.75% 2033, and the UK Treasury 3.75% 2052 and 1.125% 2039.

Early in the period, when yields were rising, we swapped our relatively shorter-dated UK Treasury 4.25% 2032 bonds for those that mature much further in the future. The further into the future a bond matures and repays its capital, the more sensitive its price will be to changes in prevailing interest rates. That's because if market rates fall the value of earning more interest than anyone else can get today is factored into the price of the bond – and if you have that rate locked in for many years to come that's more valuable than if it's only for a few years. Similarly, if rates in the market rise your bond is earning less interest than you can get if you invested today, so the value of your bond will fall – and it will fall much more if you're locked into that poor rate for many years. With yields at multi-decade highs, we felt it made sense to increase our interest rate sensitivity (or 'duration' in the lexicon).

In December, after a substantial fall in government bond yields, we took profits by selling some of our UK Treasury 0.875% 2033.

We expect the jerky sort of volatility – both up and down – that encapsulated 2023 to continue for the foreseeable future, which is why we bought the JPMorgan 4.5% Dispersion Note 2026 structured product in the period. Structured products are contracts with investment banks that pay specific returns when triggered by certain scenarios. This one pays us a quarterly coupon amounting to 4.5% each year, as well as a return based on the 'dispersion', or volatility of a basket of stocks relative to the volatility of the S&P 500 stock market index. By volatility, we mean that the prices of underlying stocks within the index move up and down more than the price of the index itself. This structured product will repay our capital and then some if the difference in volatility between the basket and the index widens between when we bought it and the January 2026 maturity. If the volatility difference decreases over the period, we will lose money.

We sold US logistics and warehouse supplier Zebra Technologies because we wanted to reduce our investments in industrial areas of the economy. We think that a mild recession is very possible in the coming year or so and Zebra, which supplies RFID gadgets and inventory management software to consumer-facing businesses, could be vulnerable.

Another complete sale was American stock Trex, which makes decking from recycled plastics, as its valuation seemed stretched after a strong rally this year.

In the third quarter we sold our telco Orange 9% 2031 bonds because the credit spread (the extra return offered above treasuries to compensate for the risk of default) had tightened considerably, so we felt it was prudent to look elsewhere.

We added to a diversifier we own which takes advantage of an idiosyncratic feature of European equity option markets. Large Continental insurers are pressured by regulation to each week buy very short-dated put options – a kind of insurance contract on the stock index. This is to make sure that a big drop in stock markets doesn't wipe out the assets required to pay out their customers' insurance claims. As you can imagine, that creates a huge amount of demand for short-dated put options, which (like anything) pushes up their price.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

The Bank of America European Catapult structured product sells these structurally overpriced put options and then uses half of the money it receives to simultaneously buy slightly longer-dated puts at keener prices. This strategy therefore makes money regardless of whether stock markets rise or fall because it simply pockets the difference between the two put prices. It should also make money if market volatility increases because it is 'long' the slightly-longer-dated put, and its value is more sensitive to changes in volatility because of its longer life. We could lose out, however, if markets fall gracefully – i.e. even as volatility *drops* (this can happen).

To avoid being too badly burned by any disappointments, we've been trimming stocks whose valuations appear to have got a bit topky and using that cash to add to stocks and other assets that have fallen from favour. We don't want to sell these businesses completely – lots of people want to buy them for a reason! – because over five years or more, we think they have the opportunity to grow well and become more valuable. Yet we try to minimise the short-term draughts that happen.

INVESTMENT OUTLOOK

The markets for bonds and locking in future interest rates imply that it's probable that the Fed will cut interest rates as soon as the first quarter. While anything is possible, we think it would require serious economic disintegration for the Fed to cut rates within the next four months or so. With current growth so high, that would be a breath-taking slump in economic activity. Instead, it seems more likely that the Fed will hold fast for a while yet. On a human level, we think central bankers' professional reputations and legacies are more at risk if they cut rates too early and let inflation flare up again. If they keep rates high and cause a minor recession, well, that's just the cost of prudent leadership...

Of course, that's not what the rest of the market hears when Fed voting members get to talking. We will have to wait and see. One of the main disconnects we see as 2024 kicks off is that many investors expect rates to follow a downward path that implies sharp economic deceleration, while simultaneously expecting chunky double-digit profit growth for companies that's rare in times of slowing (or falling) GDP.

NOTES TO THE INTERIM FINANCIAL STATEMENTS

ACCOUNTING POLICIES

The interim financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014 (and amended in June 2017).

All accounting policies applied are consistent with those of the annual report for the year ended 30 June 2023 and are detailed in full in those financial statements.

PORTFOLIO TRANSACTIONS

Total purchases and sales transactions for the half year ended 31 December 2023 were £44,960,904 (31 December 2022: £23,117,914) and £9,291,216 (31 December 2022: £8,309,603) respectively.

CROSS HOLDINGS

The Fund did not hold shares in any of the other Sub-Funds of Rathbone Greenbank Multi-Asset Portfolio at the period end.

DISTRIBUTION TABLES FOR THE HALF YEAR ENDED 31 DECEMBER 2023

DISTRIBUTION TABLES (PENCE PER SHARE)

First Interim

Group 1 – Shares purchased prior to 1 July 2023

Group 2 – Shares purchased on or after 1 July 2023 and on or before 30 September 2023

S-class income shares	Income	Equalisation	Paid 30.11.23	Paid 30.11.22
Group 1	0.47	—	0.47	0.36
Group 2	0.16	0.31	0.47	0.36

S-class accumulation shares	Income	Equalisation	Accumulated 30.11.23	Accumulated 30.11.22
Group 1	0.48	—	0.48	0.36
Group 2	0.20	0.28	0.48	0.36

Second Interim

Group 1 – Shares purchased prior to 1 October 2023

Group 2 – Shares purchased on or after 1 October 2023 and on or before 31 December 2023

S-class income shares	Income	Equalisation	Payable 29.02.24	Paid 28.02.23
Group 1	0.46	—	0.46	0.36
Group 2	0.20	0.26	0.46	0.36

S-class accumulation shares	Income	Equalisation	Allocated 29.02.24	Accumulated 28.02.23
Group 1	0.47	—	0.47	0.37
Group 2	0.23	0.24	0.47	0.37

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

INVESTMENT OBJECTIVE

The objective of the fund is to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation + 4%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. The fund aims to deliver this return with no more than five-sixths of the volatility of the FTSE Developed stock market Index.

There is no guarantee that this investment objective will be achieved over five years, or any other time period.

We use the CPI + 4% as a target for our fund's return because we aim to grow your investment considerably above inflation. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

INVESTMENT POLICY

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for the purpose of efficient portfolio management and hedging. The fund does not use derivatives for investment purposes. In the event the fund intends to use derivatives for investment purposes shareholders will be given 60 days notice.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and units in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

FUND BENCHMARK

The benchmark used for the Rathbone Dynamic Growth Portfolio is: UK Consumer Price Index +4%.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023

PERFORMANCE

In the six months ended 31 December 2023, the Rathbone Greenbank Dynamic Growth Portfolio S-class gained 3.7%. For the same period the fund's objective, the UK Consumer Price Index +4%, returned 2.3%.

MARKET OVERVIEW

The second half of 2023 got better the more it progressed. Most major stock and bond markets posted decent gains, while corporate bond prices rose rapidly as well. Even government bonds made positive returns in a year of central bank tightening. The driver of these unexpected gains was a large fall in prevailing bond yields towards the end of the year as investors first hoped for and then pre-emptively celebrated a 2024 of falling central bank interest rates, muted inflation and absent recession. It was an old-fashioned Santa rally: the returns came before the presents were handed out.

As far back as August we thought that global interest rates – as set by the world's most important central bank, the US Federal Reserve (Fed) – had peaked. Inflation, while bumpy, was clearly falling, even as global economic growth was holding up better than expected. The US economy was practically flying, though, and we felt that the Fed was unlikely to start cutting interest rates in 2023 or the first half of 2024 because it would risk putting the bellows to inflation. In December, Fed Chair Jay Powell seemed more disposed to cuts in the first half of 2024, as long as inflation fell back to the 2% target (it was 3.1% in November). While rate cuts are no doubt on the horizon, we still think investors may be getting overexcited about how quickly they will arrive. Perhaps the big variable now, rather than inflation, is US economic growth. If it continues to power ahead, the Fed will find it difficult to justify reducing borrowing costs. If it begins to falter, then the door to lower rates opens. Unfortunately, GDP growth is an extremely lagging number – you won't know it's slowing till months after it's started!

In the face of this watershed, we're trying to keep our portfolio balanced. We take profits from stocks and bond that have had particularly strong runs and recycle that money into holdings that have dipped yet still have exciting prospects over the next five years or more.

GLOBAL CROSSROADS

The world is no longer as homogenous as it once was. While the US economy has boomed, the UK, Europe and Asia have faded. And while the economic fade hasn't been as bad as many expected, it's stark when compared with the US. These divergent paths – and the divergent central bank policies that are being applied – are causing some large swings in both stock and bond prices as investors weigh up the relative rates of return on offer in different regions.

Here in the UK, with inflation at 3.9%, the Bank of England (BoE) is adamant that it won't be cutting interest rates anytime soon. That's despite the economy slipping into recession territory and many households struggling as they refinance mortgages at treble the monthly payments and rents going stratospheric. Bond investors aren't buying it: UK government bond prices now imply a 25-basis-point cut to 5.0% by May and a roughly 1.4% drop in the BoE's bank rate over the whole of 2024. We are also sceptical, and think that the BoE will have to ease pressure on households and businesses if recession sets in during the first quarter and unemployment starts to rise.

Europe is in a similar position following the Fed's 'pivot' to more accommodative policy. Like the UK, its central bank is on a 'higher for longer' footing even as its economy struggles. And also like in the UK, investors are expecting the European Central Bank to fold and begin cutting rates in early 2024. China fell into deflation in the summer, i.e. general prices for goods and services are falling, rather than rising. China is struggling with a massive property bubble where developers, local governments and households have borrowed huge amounts to build and buy millions of speculative properties that no one needs. Some aren't even finished. Deflation makes those debts grow in real (inflation-adjusted) terms. The deflation is partly caused by the heavy overhang of debt, but it also makes the burden of those debts worse. In short, it starts a toxic feedback loop which hamstring economic growth.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

China is still growing at an estimated 5%, however, and is actually convincingly overshooting what the IMF's World Economic Outlook had expected a year ago. No doubt aided by cheaper energy from, and increased commerce with, Russia in the aftermath of its invasion of Ukraine and subsequent sanctions by the West. However, many companies we see suggest the picture on the ground is far from as rosy as the headline numbers suggest. A heavily debt-laden Chinese trade partner is Japan. Its economic growth slumped unexpectedly in the third quarter as households and businesses abruptly stopped spending in the third quarter.

More than ever, the US seems to be the sole engine of economic growth. This may well encourage investors to put yet more money into the sunny uplands over the Atlantic and shun the problematic, yet often heavily discounted, markets elsewhere.

PORTFOLIO ACTIVITY

Because we think rates have peaked, both here and in the US, we've been in the habit of buying government and quasi-government bonds when yields pop higher (although, we don't buy US government bonds because they don't meet our sustainability criteria). These included the dollar-denominated European Investment Bank 3.75% 2033, and the UK Treasury 1.5% 2053.

Early in the period, when yields were rising, we swapped our relatively shorter-dated UK Treasury 4.25% 2032 bonds for those that mature much further in the future, such as the UK Treasury 1.5% 2053. The further into the future a bond matures and repays its capital, the more sensitive its price will be to changes in prevailing interest rates. That's because if market rates fall the value of earning more interest than anyone else can get today is factored into the price of the bond – and if you have that rate locked in for many years to come that's more valuable than if it's only for a few years. Similarly, if rates in the market rise your bond is earning less interest than you can get if you invested today, so the value of your bond will fall – and it will fall much more if you're locked into that poor rate for many years. With yields at multi-decade highs, we felt it made sense to increase our interest rate sensitivity (or 'duration' in the lexicon).

We expect the jerky sort of volatility – both up and down – that encapsulated 2023 to continue for the foreseeable future, which is why we bought the JPMorgan 4.5% Dispersion Note 2026 structured product in the period. Structured products are contracts with investment banks that pay specific returns when triggered by certain scenarios. This one pays us a quarterly coupon amounting to 4.5% each year, as well as a return based on the 'dispersion', or volatility of a basket of stocks relative to the volatility of the S&P 500 stock market index. By volatility, we mean that the prices of underlying stocks within the index move up and down more than the price of the index itself. This structured product will repay our capital and then some if the difference in volatility between the basket and the index widens between when we bought it and the January 2026 maturity. If the volatility difference decreases over the period, we will lose money.

We sold US logistics and warehouse supplier Zebra Technologies because we wanted to reduce our investments in industrial areas of the economy. We think that a mild recession is very possible in the coming year or so and Zebra, which supplies RFID gadgets and inventory management software to consumer-facing businesses, could be vulnerable.

Another complete sale was American stock Trex, which makes decking from recycled plastics, as its valuation seemed stretched after a strong rally this year.

In the third quarter we sold our telco Orange 9% 2031 bonds because the credit spread (the extra return offered above treasuries to compensate for the risk of default) had tightened considerably, so we felt it was prudent to look elsewhere. Around that time, as bond yields were rising, we added to our investment-grade corporate bonds, including Lloyds Banking Group 1.985% 2031, and took profits by trimming our holding of creative industries software developer Adobe as its share price popped higher.

INVESTMENT REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2023 (continued)

In October we bought Zoetis, a pet and livestock health business based in New Jersey, US. The company has been in the game since the 1950s and has diversified into many different areas, including drench and medicines for preventing parasites, vaccines against common diseases, skin ointments, diagnostics and others. Zoetis has strong and reliable profits that generate a lot of cash, which is something that we prize in investments.

If a business makes a lot of profits – and sees them quickly in cashflows as opposed to accounts receivable debts with customers – it has options and the flexibility to take advantage of opportunities that arise. It also has the tools and resources to deal with threats before they become a fatal spiral.

To avoid being too badly burned by any disappointments, we've been trimming stocks whose valuations appear to have got a bit topky and using that cash to add to stocks and other assets that have fallen from favour. We don't want to sell these businesses completely – lots of people want to buy them for a reason! – because over five years or more, we think they have the opportunity to grow well and become more valuable. Yet we try to minimise the short-term draughts that happen.

David Coombs
Fund Manager
22 January 2024

Will McIntosh-Whyte
Fund Manager

INVESTMENT OUTLOOK

The markets for bonds and locking in future interest rates imply that it's probable that the Fed will cut interest rates as soon as the first quarter. While anything is possible, we think it would require serious economic disintegration for the Fed to cut rates within the next four months or so. With current growth so high, that would be a breath-taking slump in economic activity. Instead, it seems more likely that the Fed will hold fast for a while yet. On a human level, we think central bankers' professional reputations and legacies are more at risk if they cut rates too early and let inflation flare up again. If they keep rates high and cause a minor recession, well, that's just the cost of prudent leadership...

Of course, that's not what the rest of the market hears when Fed voting members get to talking. We will have to wait and see. One of the main disconnects we see as 2024 kicks off is that many investors expect rates to follow a downward path that implies sharp economic deceleration, while simultaneously expecting chunky double-digit profit growth for companies that's rare in times of slowing (or falling) GDP.

RATHBONE GREENBANK DYNAMIC GROWTH PORTFOLIO
NOTES TO THE INTERIM FINANCIAL STATEMENTS

ACCOUNTING POLICIES

The interim financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014 (and amended in June 2017).

All accounting policies applied are consistent with those of the annual report for the year ended 30 June 2023 and are detailed in full in those financial statements.

PORTFOLIO TRANSACTIONS

Total purchases and sales transactions for the half year ended 31 December 2023 were £9,432,460 (31 December 2022: £7,692,731) and £2,707,059 (31 December 2022: £1,617,178) respectively.

CROSS HOLDINGS

The Fund did not hold shares in any of the other Sub-Funds of Rathbone Greenbank Multi-Asset Portfolio at the period end.

DISTRIBUTION TABLES FOR THE HALF YEAR ENDED 31 DECEMBER 2023

DISTRIBUTION TABLES (PENCE PER SHARE)

First Interim

Group 1 – Shares purchased prior to 1 July 2023

Group 2 – Shares purchased on or after 1 July 2023 and on or before 30 September 2023

S-class income shares	Income	Equalisation	Paid 30.11.23	Paid 30.11.22
Group 1	0.45	—	0.45	0.35
Group 2	0.20	0.25	0.45	0.35

S-class accumulation shares	Income	Equalisation	Accumulated 30.11.23	Accumulated 30.11.22
Group 1	0.47	—	0.47	0.36
Group 2	0.19	0.28	0.47	0.36

Second Interim

Group 1 – Shares purchased prior to 1 October 2023

Group 2 – Shares purchased on or after 1 October 2023 and on or before 31 December 2023

S-class income shares	Income	Equalisation	Payable 29.02.24	Paid 28.02.23
Group 1	0.35	—	0.35	0.29
Group 2	0.08	0.27	0.35	0.29

S-class accumulation shares	Income	Equalisation	Allocated 29.02.24	Accumulated 28.02.23
Group 1	0.36	—	0.36	0.29
Group 2	0.18	0.18	0.36	0.29

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

DIRECTORS' STATEMENT

This report is approved in accordance with the requirements of the Financial Conduct Authority's Collective Investment Schemes Sourcebook.

JA Rogers T Carroll
for Rathbones Asset Management Limited
ACD of Rathbone Greenbank Multi-Asset Portfolio
20 February 2024

GENERAL INFORMATION

MANAGER NAME

Effective 30 November 2023, Rathbone Unit Trust Management Limited changed its name to Rathbones Asset Management Limited.

AUTHORISED STATUS

Rathbone Greenbank Multi-Asset Portfolio (the Company) is an investment Company with variable capital (ICVC) incorporated in England and Wales under registered number 945533 and authorised by the Financial Conduct Authority on 23 February 2021.

Rathbone Greenbank Multi-Asset Portfolio is structured as an umbrella scheme. Provision exists for an unlimited number of sub-funds, and at the date of this report four sub-funds, Rathbone Greenbank Defensive Growth Portfolio, Rathbone Greenbank Dynamic Growth Portfolio, Rathbone Greenbank Strategic Growth Portfolio and Rathbone Greenbank Total Return Portfolio, are available for investment. The shareholders are not liable for the debts of the Company.

Each fund represents a segregated portfolio of assets and accordingly, the assets of each fund belong exclusively to that fund and shall not be used or made available to discharge the liabilities of any other fund.

VALUATION OF THE SUB-FUNDS

The sub-funds are valued on each business day at 12 noon for the purpose of determining prices at which shares in the sub-funds may be bought or sold. Valuations may be made at other times on business days with the Depository's approval.

STEWARDSHIP CODE

Rathbones Asset Management Limited fully supports the UK Stewardship Code sponsored by the Financial Reporting Council. Our statement on complying with the Code can be found on our website: rathbonesam.com

BUYING AND SELLING OF SHARES

The ACD is available to receive requests for the buying and selling of shares on business days between 9.00am and 5.00pm and transactions will be effected at prices determined by the next valuation. Application forms for shares (obtainable from the ACD or the Administrator) should be completed and sent to the Administrator. In respect of telephoned orders, remittances should be sent on receipt of the contract note. Contract notes confirming transactions will be issued by the close of business on the next business day after the dealing date. Purchasers of shares are required to enter their registration details on the form supplied with their contract note. Once shares are paid for these details will be entered on the share register.

Shares can be sold by telephone, fax or letter followed by despatch to the Administrator of the authorisation to sell duly completed by all shareholders.

In the absence of clear written instructions signed by all the registered holders, a Form of Renunciation will be sent out together with the repurchase contract note. This will need to be signed by all registered holders, and returned to our Administrators before settlement can be made. Settlement will be made on whichever is the later of four business days after the dealing date or four days after the receipt of written confirmation.

Shareholders may sell shares on submitting the purchase contract note and a duly executed Deed of Transfer. The issue and redemption of shares will not take place if dealing in the shares is suspended by operation of law or any statute for the time being in place. Sales, in shares, constituting a "large deal" may receive a lower price than the published price.

The minimum initial investment for S-class shares is £1,000. Thereafter holders may invest additional amounts to the value of £500 or more from time to time as they wish. Any number of shares may be subscribed, sold or transferred so long as transaction complies with applicable minimums.

The ACD currently receives an annual remuneration for managing the S-class property of the fund at the rate of 0.50%.

GENERAL INFORMATION (continued)

STATEMENTS

A distribution statement showing the rate per share and your shareholding will be sent quarterly on 28 February, 31 May, 31 August and 30 November.

The current value of your shares is shown on a valuation statement, which shows the number of shares bought over the previous six months, the total number of shares in your account and their current value.

Twice yearly on 30 June and 31 December, shareholders will receive a consolidated valuation statement showing, where applicable, their ICVC, Unit Trust and ISA holdings for each fund held.

PRICES

Prices are available on our website rathbonesam.com

OTHER INFORMATION

Copies of the Prospectus, Key Investor Information Document, Supplementary Information Document and the most recent Annual and Interim Reports may be obtained free of charge on application to the ACD or seen by visiting their registered office.

The Register of Shareholders can be inspected during normal business hours at the office of the Registrar, SS&C Financial Services International Limited, SS&C House, St Nicholas Lane, Basildon, Essex SS15 5FS.

Further copies of this report are available upon request, free of charge, from Client Services Department, Rathbones Asset Management Limited, 8 Finsbury Circus, London EC2M 7AZ.

If you have any queries or complaints about the operation of the Company you should put them to the Compliance Officer, Rathbones Asset Management Limited, 8 Finsbury Circus, London EC2M 7AZ. Any complaint we receive will be handled in accordance with our internal complaint procedures. A copy of these are available from the Compliance Officer.

If you have occasion to complain, and in the unlikely event that you do not receive a satisfactory response, you may direct your complaint to the Financial Ombudsman Service at Exchange Tower, London E14 9SR. Further details about the Financial Ombudsman Service are available on their website at financial-ombudsman.org.uk

ISA ELIGIBILITY

The fund has been managed throughout the year to ensure that it is eligible to qualify and be included in an Individual Savings Account (ISA). The fund will at all times be invested in such a way that the units will constitute "Qualifying Investments" for the purposes of the Individual Savings Account (ISA) Regulations 1998, as amended from time to time.

RISK FACTORS

Investments in an investment Company with variable capital should be regarded as a longer term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance should not be seen as an indication of future performance. Investments denominated in currencies other than the base currency are subject to fluctuations in exchange rates which can be favourable or unfavourable. Where the ACD's charge is fully or partly taken out of the fund's capital, distributable income will be increased at the expense of capital which will either be eroded or future growth restricted.

GENERAL INFORMATION (continued)

VALUE ASSESSMENT

Our regulator, the Financial Conduct Authority (FCA), has asked us to assess the value of our funds. Assessing value is much more than just looking at the fees you pay or the performance of your fund in isolation. Considering this, we have designed an assessment which looks at nine criteria.

We have also appointed an independent research firm, Square Mile Investment Consulting & Research, to provide an impartial report on the value our funds offer compared with the market.

It is the responsibility of our board of directors to consider the outcomes of these assessments, ensure they are clear and fair, and then communicate to you, our investors, if we have delivered value or, if not, where we need to improve.

You can view the value assessments for the Funds four months after their period end on our website rathbonesam.com
