Rathbone SICAV Global Opportunities Fund

This is a marketing communication. Please refer to the Prospectus of the UCITS and the KID before making any final investment decisions. The decision to invest in the fund should take into account all the characteristics or objectives of the fund as described in its prospectus.

Investment objective

The sub-fund's objective is to seek above-average growth of your investment over the long term, at least a five-year investment period. There is no guarantee that this investment objective will be achieved over five years, or any other time period. Under normal circumstances, the sub-fund invests mainly in shares of companies from around the world. Generally investing in companies that appear poised for above average expansion yet have not been recognised by the market.

The sub-fund may also invest in other securities permitted by UCITS regulations. The sub-fund may use investment techniques and derivatives for efficient portfolio management (including hedging). The sub-fund is classified as an Article 6 financial product under SFDR.

Investment strategy

This is a stock-picking fund, which means we invest in a small number of global stocks. We search developed countries for innovative and scalable businesses that are growing fast and shaking up their industries.

To be successful, we believe businesses have to offer something that others can't match - a star quality. They must be easy to understand, different to their competitors, durable to change and difficult to imitate. Companies must have a plan to grow rapidly without running out of money or overstressing their resources. Our speciality is spotting these businesses before they are household names.

We buy companies of all sizes, but our sweet spot is mid-sized growth companies in developed markets. We avoid investing in companies listed in emerging markets.

We avoid investing in businesses which have previously performed poorly, preferring those with an unblemished past. We don't invest in unpredictable sectors with poor growth prospects. To reduce risk, we hold a diverse bucket of companies with slow and steady growth that should be less sensitive to the economy.

Management

James Thomson
